

## Project manager /Post-doctoral researcher

Toulouse Hospital

UMR 1295 CERPOP - Inserm – Toulouse University

Team: Perinatal, pediatric and adolescent health: epidemiological and evaluative approach

As part of an European research project on rare diseases (EJP-RD), a joint team (CHU Toulouse/ Inserm Unit 1295) is coordinating a research project on non-progressive congenital ataxia or ataxic cerebral palsy. The overall aim of this project is to improve knowledge of non-progressive congenital ataxia by seeking further evidence to understand its origin, predict its natural history and measure its impact.

In this context, the Toulouse University Hospital is looking for a project manager/post-doctoral researcher to coordinate the scientific and regulatory aspects of the project, he or she will be in charge of:

- manage, in collaboration with the partners involved, the clinical study: protocol, ethical and regulatory aspects, management of tools, field management, e-CRF and database
- manage the network of European partners
- manage the quality of life study, choice of instruments, field management, contribute to results analysis
- contribute to study data management and FAIRification process
- manage the development and updating of the project website
- monitor milestones and deliverables, multisite monitoring, local project meetings
- liaise with patient associations
- contribute to the valorization of results, drafting of study reports and scientific publications
- disseminate results and organize seminars for patient families

### **Requirements**

- PhD or equivalent in health sciences or epidemiology or public health
- Good knowledge of data management
- Research experience at European level
- Experience in managing multi-center projects
- Good knowledge of disability issues
- Excellent oral and written English skills

### **Skills/Qualifications**

- Experience in managing complex multi-site and multi-partner projects with multiple deliverables and work packages

- Good knowledge of statistical software SAS or STATA or R
- Good communication skills
- Research experience at European level
- Design, formalize and adapt procedures/protocols
- Know the regulatory framework for research and the ethical, legal and governance obligations and procedures relevant to the conduct of research
- Write and format documents, reports and publications

**Additional Information**

Work Location : CHU Toulouse, Hôpital Paule de Viguier, 330 Avenue de Grande Bretagne 31300, Toulouse, France

Full time; 36-month fixed-term contract

Remuneration according to Toulouse University Hospital pay scale
