

If you are looking to bring your solid research skills to a fast moving environment, creative, exploratory, ambitious and entrepreneurial, please apply, we could be the right fit.

## ✓ MISSION

As a key team member of a very innovative charity, you will

- Be the catalyst to promote, enable and develop participative research in cancerology.
- Conduct and develop new EU research projects, on quality of life related topics

## ✓ ABOUT US

The candidate will join the Citoyens and Recherche/Seintinelles team ([www.Seintinelles.com](http://www.Seintinelles.com)).

Citoyens et Recherche/Seintinelles is a charity whose vocation is **to promote and enable a much closer collaboration between citizens and researchers on cancer research** (mostly on topics related to quality of life, side effects and prevention).

We have a community in France of 38 255 citizens (les Seintinelles) and 736 researchers engaged with us. During the last 10 years, we took part in 65 researches, generated 112 000 participations , which led to 26 articles.

After proving that we can mutualize and massify recruitment for non-interventional researches, we want to take it the next level and we have **huge ambitions in promoting and enabling through mutualization participative research in cancerology in France and in Europe**

Our scientific project manager will be in charge of bringing this ambition to life, as well as raising our profile as a key partner on EU projects. .

You'll be joining a small team of 2 permanent employees, and a wide and open ecosystem of partners.

## ✓ MAIN RESPONSIBILITIES :

## **Bring to life our ambition on participative research**

Write our roadmap (partnerships/tools/advocacy program to drive a cultural shift within the research community/ coordination with the EU Cancer Mission) and make it happen.

On that specific project, the candidate will work closely with Marie Préau, University Professor in Health Psychology, at Lyon 2 university, and her team.

## **Lead and project manage our participation in EU projects (existing and coming)**

- Lead our participation in the Pragma-Til EU funded projects

This trial aims to enhance the quality of life of cancer patients benefiting from very innovative therapies (TIL-ACT).

The scientific project manager will be responsible for collective qualitative data about patient experience , in close collaboration with the other members of the WP3 (Gustave Roussy, Unicancer and La Caixa), and in coordination with the participating centers (in 6 European countries). From coordination of data capture to analysis and publication of results to scientific audiences and the general public.

- Raise our profile within the EU research community as a potential partner for other big EU projects, and answer call for projects.

## **Be our scientific coordinator**

Be the scientific and regulatory key point of contact of all the researchers working with us. And the project manager of our scientific committee.

## **SPECIFICS**

Permanent role - Full time- Based in Paris

Salary: 38 to 40 K€

Full remote could be considered

## **COULD YOU BE THE ONE ?**

### **Profile**

PhD in Psychology, Sociology, Sciences of information & communication, or Public Health (with a major in social and human sciences)

The position is open **to early-career researchers only**.

We will privilege a postdoctoral research for which it is the first long time assignment.

## PLEASE APPLY ONLY IF YOU MEET THIS PROFILE

### Experience:

- Research experience in clinical or health-related projects (e.g. health psychology, health services research, pragmatic clinical trials)
- Research experience with patient populations, especially in oncology, will be valued
- Experience working in interdisciplinary projects will be valued
- Experience working in international collaborations will be valued.

### Knowledge & Skills

#### *Academic*

- Knowledge of research methodology (observational studies, and clinical trials).
- Knowledge of and demonstrable skills in qualitative research and mixed-methods research.
- Communication skills in cross-cultural and cross-disciplinary contexts.
- Project management skills, ability to manage and lead towards objectives, timelines and budget.
- Academic writing skills, ability to communicate clearly both orally and in written.
- Organizational skills and excellent attention to detail.
- Excellent command of French and English.

#### *Non academic*

We are an ambitious (but still small) charity. So on top of your solid scientific background, **pragmatism, entrepreneur spirit, polyvalence and autonomy will be key for you to succeed** in our fast moving and not always very formal environment.

### Others:

- Openness to travel internationally as requested by the project necessities.
- Openness to travel to Paris on a very regular basis if you are not living there., and working fully remote.

## HOW TO APPLY ?

You can apply at [contact@seintinelles.com](mailto:contact@seintinelles.com), sending us your CV and your research CV.

And a short answer to those 3 questions

- Why us ?
- Why you ?
- What is your experience in participative research ?
